Discover our Division

amitahc has been working from the beginning with a Life Science “state of mind”; Pharmaceutical is in our company DNA since we always speak about Health Care in terms of high quality of the products and customized services.

Pharmaceutical is the division based on the strong support coming from the technologies we can offer:
Biotech, Intermediates&Impurities and Phytoactives.

DISCOVER OUR INGREDIENTS

Biotech

A line of highly purified biotech Sodium Hyaluronate grade with hydrating properties and Ectoine, a cyclic amino acid biotech derivative, as a natural protective ingredient.

Intermediates&Impurities

Customized and selected ingredients such synthesis of impurities and metabolites, deuterated compounds and standards of active pharmaceutical ingredients.

Phytoactives

High purity natural origin derived ingredients and intermediates which can be mainly used in medical devices.

Discover our Partners

Chimete

Chimete has been providing outsourcing services dedicated to Research & Development in the field of organic synthesis and analytical research since 1997. It develops and optimizes processes from the molecule discovery to scale-up process and the development of purification methods, including the isolation and characterization of impurities, metabolites and deuterated compounds formed during the process. Chimete's laboratory offers the preparation of standards of non-commercial molecules, impurities of active ingredients and metabolites of active ingredients

Kikkoman biochemifa company

A Japanese company who appeared on the market for the first time in 1917 with soy sauce business, becoming the number one soy sauce producer in the world. They have strengthened their presence on the market by specializing in the business of biochemicals, particularly in the ingredient for pharmaceutical sector with specific sodium hyaluronate pharmaceutical grade. Obtained by microbial fermentation (by *Streptococcus zooepidemicus*), it can be used as API or functional ingredient for several applications among which the most important are for dermal filler and intra-articular applications.

ROELMI·HPC
Health & Personal Care

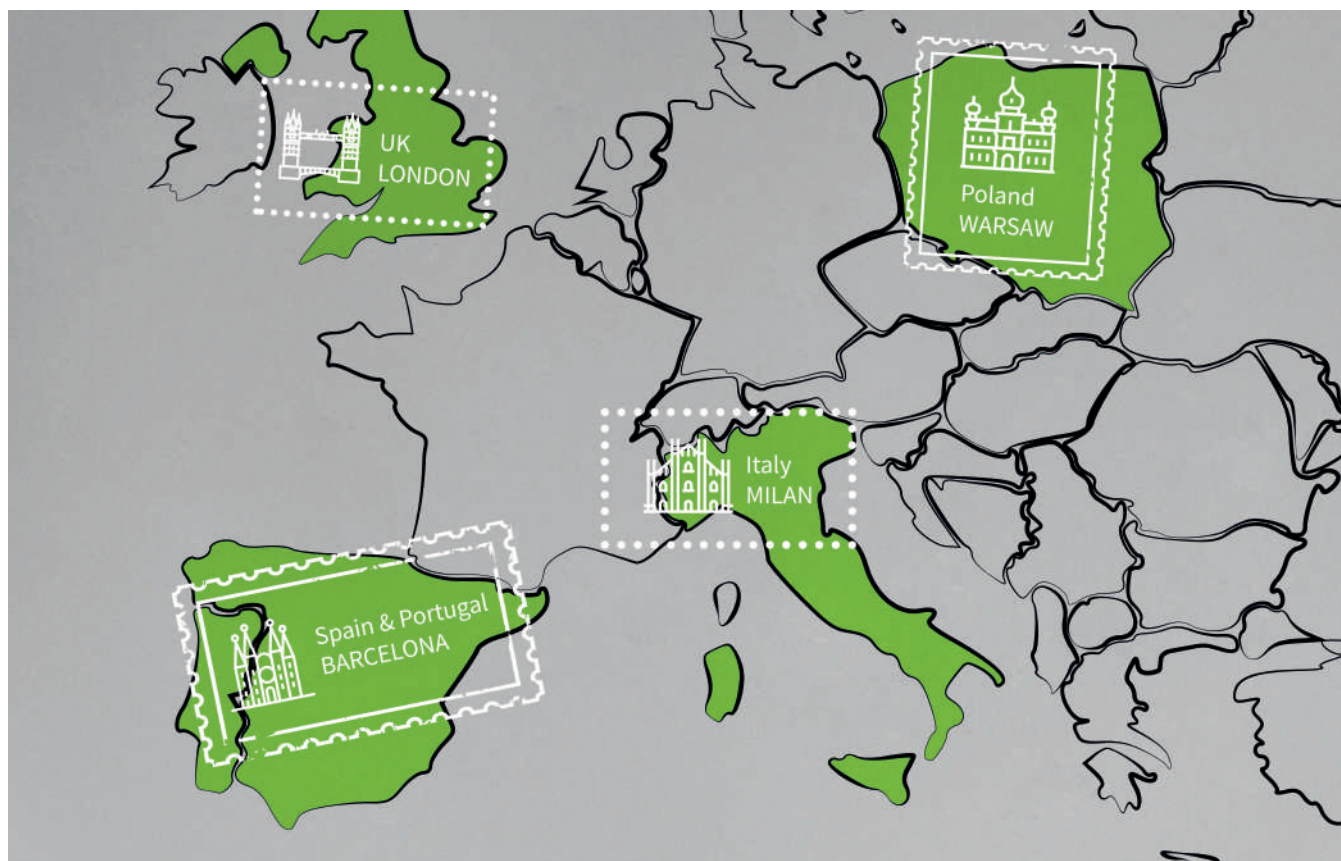

ROELMI HPC

ROELMI HPC designs and produces ingredients with the highest respect for people and the environment. By combining passion with a broad expertise, formulates the best solution to every customer's challenge. ÆCTive® MD, natural protective ingredient, obtained by a patented fermentation process, is an osmolyte able to rebalance the microenvironment, maintaining the ideal conditions for the cells to survive. It acts against harmful environmental influences and it can be used for ophthalmic, vaginal, rectal diseases and dermatological conditions.

amita**hc** Group

We are an international group completely dedicated to health care and specialized in the distribution of innovative and sustainable ingredients for the markets of **Personal Care**, **Nutraceutical** and **Pharmaceutical**.

The amitahc wide portfolio includes high quality products from worldwide top manufacturers as well as the exclusive amiBrands, ranges of top performance ingredients developed in close collaboration with the amitahc partners.

People are one of the greatest treasures. Our Team is dynamic, growing and passionate. Thanks to more than twenty-years of experience we have all the necessary knowledge for offering our clients full formulations and regulatory support in developing final products.

Through offices in Italy, Poland, Spain and UK, we are always beside our clients ensuring full support and high added value specialties, thanks to the established win-win partnerships with top quality worldwide producers that enable us to keep a wide open eye on the future.
